

## Release Notes for Edits Management Tool (EMT)

### Version 1.4.2

**Release Date: November 8, 2019**

EMT Version 1.4.2 is compatible with Winrecs 296.2

---

**0153 EMT Unable to save condition or edit-Duplicate name error**

Able to save a Field Condition, Logical Condition and Edit with the same name if the module selected are different.

**0154 Field Condition Provider Number some descriptions not displaying**

When creating or modifying a Field Condition when select a field value from a look up table, it will consistently display the description attached to the value.

**0155 In Field Condition when change OPERATOR it clears the values in list**

In a Field Condition, when change the Operator Equal to Not Equal to, Like to Not Like, it will not remove the values already selected in the list.

**0157 Record Update History missing**

A Record Update History has been added to the the Field Condition, Logical Condition and Edit window. Previous edits will not be updated. Previous conditions edits must be saved in order to populate the Record Update History with Coder Number, Date and Time.

**0164 Field Condition, field occurrence REMOVE 'Specific Occurrence'**

When creating a Field Condition, the Use Field Occurrence "Specific Occurrence" has been disabled. In order to include a specific occurrence in the edit, create a Field Condition using the Occurrence field.

**0167 Unable to De-select Same Occurrence (Multiforms) option**

In the Logical Condition window for 'Same Occurrence (Multiforms)', if multiform fields do not apply to SAME occurrence fields can de-select multiform as N/A.
