

Release Notes for Edits Management Tool (EMT) Version 1.4

Release Date: May 20, 2017

EMT Version 1.4 is compatible with Winrecs 294.1

EMT Editor

0108 Field Condition Editor-Add Look Up value description

When creating a Field Condition and using Operator Equal To or Not Equal To, the values selected will now display the corresponding description.

0110 Add Between and Not Between Operator

The Operator 'Between' and 'Not Between' has been added to the Field Condition Editor.

0112 Add Key Function to mouse function

Corresponding Functions Keys have been added to the EMT Editor, Field Condition Editor and Logical Condition Editor. Function Keys are [F7] Save, [F5] New, [F9] Delete.

0119 Add occurrence fields to field drop down lists

In the Field Condition Editor, the occurrence fields from all the multiforms have been added to be able to create edits on occurrence number.
Eg. Diagnosis Code ="Z51.5" and Diagnosis Occurrence>25

0130 Edit does not generate when only one occurrence is captured

If an edit is created for a field from a multiform and the <> operator is used, the edit did not generate if there is only one occurrence captured.
