

Release Notes for WinRecs Version 302.0.0

Release Date: March 13, 2025

The 302.0.0 Fiscal Release includes 2025 CIHI edit and Table updates.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version **301.0.0** or greater.

Important:

For those sites with CMG and CACS Groupers, the 302.0.0 Release contains a Grouper Engine update. Fiscal 2025 DAD and NACRS Level 2/3 abstracts must be batch grouped prior to submitting 2025 Period 01 files to CIHI. A warning message indicating “No Grouper value...” will display should the record not be grouped with the current grouper year.

After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to <ftp://ftp.med2020.ca/Winrecs2/Tools/> and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

For additional information on this, or previous releases, contact MED2020 Customer Support at <mailto:support@med2020.ca>.
