Release Notes for WinRecs Version 302.2.0

Release Date: September 25, 2025

The 302.2.0 Fiscal Release includes 2025 CIHI Table Updates and Fixes Bug Issues.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version 302.0.0 or greater.

Important:
After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to ftp://ftp.med2020.ca/Winrecs2/Tools/ and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

PR_25484 DAD Error 10 01 54 Generating Incorrectly

This DAD core edit 10 01 54 was not firing correctly
If institution type is acute (1) and diagnosis type is 2 (excluding diagnosis codes with the first character='O') and there is at least one intervention episode location code 01 or 08
or (OOH indicator='Y' and OOH intervention codes in 3IP10, 1IJ50, 1IJ57), diagnosis prefix must be 5, 6 or J

Also entering the following information created a hard error
 enter Dx Prefix 5 or 6 to either of the dx codes with DX Type 2 I get the following incorrect hard edit:

Both edit errors have been fixed in this release
