Release Notes for WinRecs Version 295.0.0

Release Date: March 15, 2018

The 2018 CIHI Fiscal edits** as well as the new 2018 CIHI Data elements are included in this fiscal release. Problem fixes and enhancements have been included as outlined in the Release Notes.

NOTE: **Cancer Care changes have <u>not</u> been included - a special exe patch will be issued to include those changes for clients who use the Cancer Care module.

DAD CJRR:

Sites using the DAD CJRR fields must do the following to enable the DAD CJRR Form:

1) In the DAD Institution Profile enter a value of Y in the "Submit CJRR in DAD/SDS Submission" field.

2) Element 11-22 Intervention Joint Identifier (intervention multi-form) must have a value of 1 or 2 to enable the CJRR form. Click forward(F12) and the CJRR Form will open.

This release is cumulative only after the most recent WinRecs Update has been applied and therefore must be run on WinRecs installations that are on *version 295.0.0 or greater*.

NB: After all Fiscal Releases and Service updates have been applied coders should check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses.

Please note that WinRecs Version 295.0.0 contains a Fiscal Grouper Engine update. Clients with the CACS and CMG+/ CACS groupers please ensure all users are able to see the grouper information within the abstracting modules after applying this update. For clients with CACS and CMG+/CACS groupers you must batch group data prior to submitting Period 01 for 2018.

For additional information on this, or previous releases, contact MED2020 Customer Support at support@med2020.ca.
