About This Document

The information contained in this document focuses on applying updates for WinRecs.

To learn more about using WinRecs please refer to the WinRecs User Guide, also available as a download from the MED2020 Client site, located in Documentation Folders within the Update Folders at:

<ftp://web.med2020.ca/WR2Update/>

Document Conventions

Throughout this Technical Guide, text formatting is used to complement the information provided.

Function keys and key sequences are distinguished by large bold text.

Example: **CTRL+M**

References to modules, functions and other values as displayed on the screen are distinguished by italic text.

Example: *WinRecs Application Menu*

File names, paths and cross-references to other sections of the User Guide are distinguished by bold text.

Example: **Command line used for installing SQL Server**

Example: **D:\setup.exe /template.ini**

Values to be typed are distinguished by the courier font.

Example: Type 01011920 in the field.

Note: Important notes and hints are distinguished by blue text with a light gray background.

Example **Note:** This is an important note.

Before You Begin...

Prior to installing any software, please ensure that you have made backup copies of your sensitive data. Also please ensure that you have your backups readily available, and that you know the exact path to your databases. MED2020 cannot be held responsible for data loss, nor can MED2020 assist with data backup and recovery. Instructions for backup and recovery are outside the scope of this document.

Update your test/live databases as per your usual internal process (turn off HL7 interface during update if applicable) and ensure all users are logged off the system.

Note: It is recommended to turn off any antivirus program for the installation as it could interfere and block some of the files and/or processes from completing.

The automated update package is provided in self-extracting EXE and MSI; they can be accessed through the FTP site update folders at: <ftp://web.med2020.ca/WR2Update/>.

The following are examples for the types of updates:

292_2_WinRecs_Update.exe	For manual execution on one workstation
292_2_2_WinRecs_Update.msi	For services (i.e. SMS push) to deploy it to multiple workstations

Running Update

The following applies to the workstation/client portion of the update package:

If local PC user permissions are too restrictive for the “log in/out/in” routine to successfully update the workstation with the latest WinRecs EXE and Grouper DLL, the .exe can be run by any administrator on any workstation with WinRecs already installed to update the installation directory with the necessary files. To assist sites that have many workstations requiring an update, the .msi program has been designed such that it can be included as part of a network “software deployment/push” and installed across a network.

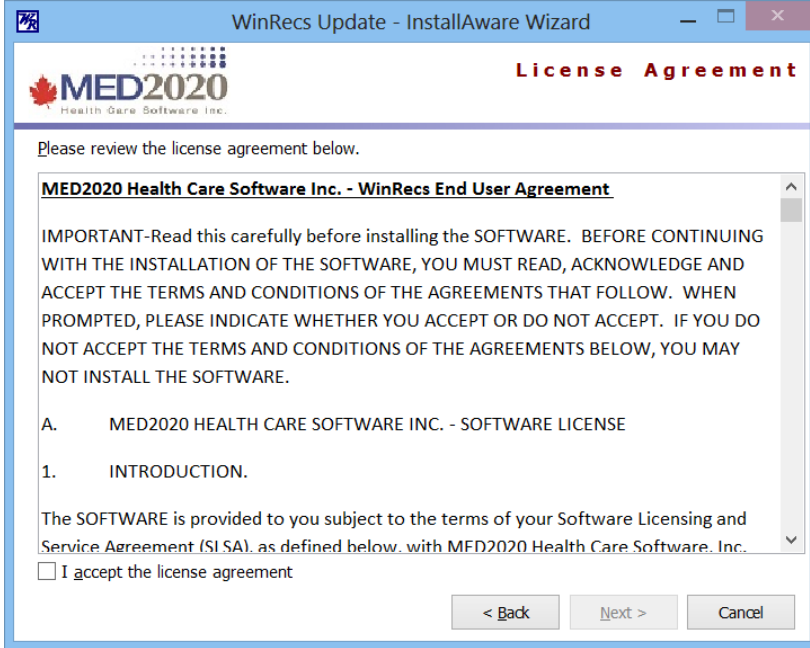

If MSI package is used and “pushed” across the network in silent mode it will automatically perform workstation only update.

Note: If you are using the silent install, User Account Control Setting has to be turned off in Client machine in order to make the silent Installation running smoothly. Otherwise the “signed shell” would be pop up in client side when doing network push.

In order to start the update, double click on the WinRecs icon to begin update process.

Types of Updates

Once you get to this screen you have multiple options, each taking you to the different parts of the document

- 1) Update the WinRecs client (Option 1: Workstation Only Update)
- 2) Update the WinRecs database only (Option 2: Database Update)
- 3) Update the WinRecs database and the client (Option 3: Complete Update)
- 4) Update WinRecs database (Option 4: Customized Update)

Option 1: Workstation Update

Click "Next"

Navigate to the location where WinRecs is already installed and click "Next"

Click "Next"

Your update is complete.

Option 2: Database Update

Click "Next"

Click "Next"

Next you will be directed to the database update.

Once the WinRecs update begins; Click "Next"

The installer will apply the update to the specified database located on the specified SQL Server. To change this information, modify the appropriate fields below.

Server Name:

Select your server from the drop down menu or enter it manually;
Click "Next"

Choose the database on which to apply the service release update.

Database Name:

Select your database from the drop down menu or enter it manually;
Click "Next"

Accept the terms and click "Next".

Click "Next".

Update is complete; click "Close"

For additional databases the update should be relaunched following the same steps.

Click the Finish button.

Option 3: Complete Update

Click "Next"

Navigate to the location where WinRecs is already installed and click "Next".

Click "Next".

Next you will be directed to the database update.

Once the WinRecs update package begins; Click "Next"

Select your server from the drop down menu or enter it manually;
Click "Next"

The dialog box is titled "Select Database for SR Update". It features a database cylinder icon on the left. The text reads: "Choose the database on which to apply the service release update." Below this is a "Database Name:" label followed by a text input field with a dropdown arrow and a browse button "...". At the bottom are three buttons: "Cancel", "< Back", and "Next >".

Select your database from the drop down menu or enter it manually;
Click "Next"

The dialog box is titled "Software License Agreement". It contains a document icon with a signature. The text reads: "Please read the following License Agreement. Press the PAGE DOWN key to see the rest of the agreement." Below this is a scrollable text area titled "INTER RAI END USER LICENSE AGREEMENT". The text in the scroll area states: "By clicking on 'accept' where indicated below, or by installing or otherwise using the WinRecs software (the 'Software') provided by MED2020 Healthcare Software (the 'Vendor'), you are deemed to have agreed to the terms and conditions of this License Agreement with interRAI. InterRAI is a non-profit corporation formed in the District of Columbia of the United States and is a collaborative network of researchers in over 25 countries committed to improving health care for persons who are elderly, frail or disabled." Below the scroll area is a question: "Do you accept all the terms of the preceding License Agreement? If you choose No, Setup will close. To install WinRecs Service Release Update, you must accept this agreement." There is a checked checkbox labeled "I accept the agreement". At the bottom are three buttons: "< Back", "Yes", and "No".

Accept the terms and click "Next".

Click "Next"

Update is complete; click "Close"

For additional databases the update should be relaunched following the same steps.

Click "Finish".

Option 4: Customized Update

Select Customized Update and Click “Next”.

Select the desired option from the screen and click “Next”.
Use instruction from options 1, 2 or 3 depending on the selected option.

Documentation

dbresults.xml

After running an update, this file will be created and placed in the directory of the update program. If there are errors reported by the update process and found in the dbresults.xml file, please email this file to Customer Support (support@med2020.ca) and a representative will follow-up with you as soon as possible.
