

## Release Notes for WinRecs Version 295.3.0

**Release Date: December 06, 2018**

This release must be run on WinRecs installations that are on minimal version **295.0.0**.

### **Important:**

**NACRS Clinic Lite VS Level 3 Clinic Changes** - please reference tickets EN-1430 and EN-1441. See also November 29, 2018 Forum posting

**Special DAD Project 012:** please reference ticket EN-1408 to ensure the proper set up is done to auto-populate this project. **NOTE:** The valid from date has been set to 20190101 for this project.

**Updated CIHI Edit specs** as well as the latest Institution Type CIHI listing are included in this release.

**After all Fiscal Releases and Service updates have been applied** coders should check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses.

For additional information on this, or previous releases, contact MED2020 Customer Support at [support@med2020.ca](mailto:support@med2020.ca).

## Table of Contents

### **AmCare (NACRS)**

EN-1430	NACRS Clinic Lite Enhancement
---------	-------------------------------

### **CodeFinder Integration**

PR-1400	3M Bridge: WinRecs Day Surgery Intervention Defaults
---------	--

PR-1413	3m Codefinder Issue
---------	---------------------

### **Continuing Care (CCRS)**

PR-1424	Control Header Issues with Clinical Submissions
---------	---

### **Crystal Views**

ED-1399	Add zzAssessmentLink Field to Rehab_Interrupt_VR
---------	--

ED-1402	Abstract Profile Crystal View
---------	-------------------------------

ED-1412	I10_AllAbstractingGeneral_VR
---------	------------------------------

**Inpatient (DAD)**

ED-1408	DAD Special Project 012
PR-1414	Extent Attribute Edit Not Generating
PR-1419	CJRR Hard Error-Coded Component

**Mental Health (OHMRS)**

ED-1392	New 2018 DSM-V tables
---------	-----------------------

**Same Day Surgery (SDS)**

ED-1415	Allow Blank Anesthetic Type for Cancelled Day Surgery
---------	---

**System Maintenance - Look Up Profile**

ED-1409	V1.6 DAD Institutions and Types
ED-1443	Institution Type Change for Ontario Institution Number 59950

**Utilities - CIHI Submissions**

EN-1441	NACRS: Clinic Lite Submissions
---------	--------------------------------

## Ticket Details

### AmCare (NACRS)

#### EN-1430 NACRS Clinic Lite Enhancement

In consultation with CIHI, MED2020 was advised that while Ontario clients were instructed to use one of the following MIS codes for the Clinic Lite Bundling projects, 713508545 (Care Group CL) or 714500000 (Care Group OT), they cannot guarantee sites will use these numbers. Additionally, sites may choose to submit other types of Clinic Lite cases with an Ambulatory Care Group type of CL (Clinic).

As the sites use the same Institution number for both Clinic Lite and Level 3 submissions MED2020 has no way to distinguish between the CL (clinic) cases that are actual Clinic Lite cases as opposed to Level 3 cases and can potentially affect submissions. Considering this the following changes will be in 295.3.0:

- 1) A new field will be added called NACRS Clinic Lite submission
- 2) If Ambulatory Care Group = OT or DI this field will automatically populate the new field with a Y. Ambulatory Care Group types OT or DI can only be submitted for Clinic Lite.
- 3) If the Ambulatory Care Group = CL clients will now be prompted with a Question: Is This a Clinic Lite submission. Answering Yes will populate a Y in the NACRS Clinic lite submission.
- 4) Clinic Lite Submissions will only pick up the CL cases that have a Y in the NACRS Clinic Lite submission field.
- 5) All other clinic cases will be submitted as Level 3.

For sites that populate all NACRS Lite field values via interface with no coder input this will require a modification to your interface to populate the NACRS Clinic Lite Submission field with a Y. Please contact Client Services for a quote on the interface modification – updated specs and test sample must be submitted prior to the quote being sent.

A new Care Type has been added in the Submissions and Corrections Modules: B-C-Lite: Clinic Lite (CL, DI, OT).

When this Care Type is used the submission level will default to 0.

The new field NACRS Clinic Lite submission has also been added to all I10\_Amcare\* views.

### CodeFinder Integration

#### PR-1400 3M Bridge: WinRecs Day Surgery Intervention Defaults

The Intervention Start/End dates, Provider number/specialty defaults in the DAD Day Surgery intervention multiform were being removed when exiting the codefinder. This issue has been resolved.

#### PR-1413 3m Codefinder Issue

When the 3M Codefinder was used with the OMHRS module the codefinder would crash. This was due to new fields in place that were not expected and has been fixed.

### Continuing Care (CCRS)

#### PR-1424 Control Header Issues with Clinical Submissions

An issue was identified for CCRS and OMHRS submissions in the control file header with values starting in incorrect start positions. This issue has been corrected

## Crystal Views

### ED-1399 Add zzAssessmentLink Field to Rehab\_Interrupt\_VR

The field zzAssessmentLink has been added to the Rehab\_Interrupt\_VR .

### ED-1402 Abstract Profile Crystal View

For clients that have created Abstract Profiles for the Amcare or Inpatient modules, two views have been created called I10\_Amcare\_Profile\_VR and I10\_Abtracting\_Profile\_VR. These views will extract the Profile visit information.

### ED-1412 I10\_AllAbtractingGeneral\_VR

The following fields have been added to the I10\_AllAbtractingGeneral\_VR:

IIsAbstractCorrectedLevel1  
IsAbstractCorrectedLevel2  
IsAbstractCorrectedLite  
IsAbstractSubmittedLevel1  
IsAbstractSubmittedLevel2  
IsAbstractSubmittedLite  
IsAbstractValidatedLevel1  
IsAbstractValidatedLevel2  
IsAbstractValidatedLite

## Inpatient (DAD)

### ED-1408 DAD Special Project 012

DAD Special Project 012 has been added to the Projects Table . In addition the following enhancement was added to accommodate Special Project 012:

- 1) Encounter Number field (non submitted field) has increased in field size from 16 to 20 as the per the specs for the field size for the project.
- 2) A new field has been added to the Institution Profile: "Auto populate Project 012 From ENC#" with the following options:  
N – No  
Y – Yes, only once  
U –Yes, update when Encounter Number is changed  
Clients who wish to auto-populate Project 012 must have a value of Y or U in this field.
- 3) After entering encounter number in the encounter number field, Project 012 and the encounter number will populate in the first blank project occurrence. For records that populate the encounter number via interface the project will auto-populate when the record is loaded.

### PR-1414 Extent Attribute Edit Not Generating

The below edit only generated when Intervention Code 1GZ31CA\* is entered with intervention attribute extent value of 0. This issue has been corrected to look at intervention codes 1GZ31CA, 1GZ31CRND or 1GZ31GPND in combination with attribute extent value 0.

Error 110534: If an Intervention Code of 1GZ31CA, 1GZ31CRND or 1GZ31GPND is coded then Extent Attribute cannot be 0.

### PR-1419 CJRR Hard Error-Coded Component

A hard error was triggering incorrectly when coding CJRR: "Coded Components must be unique if (Intervention Code is 1VA53, 1SQ53, 1VG53 OR 1VP53) AND (Status Attribute is P or R) AND OOH Indicator is blank AND (Joint Identifier is coded and valid)". This has been corrected.

## Mental Health (OHMRS)

### ED-1392 New 2018 DSM-V tables

OMHRS DSM-5 code table was updated which includes numerous code description changes as well as one new code: V71.09 (No diagnosis or condition).

## Same Day Surgery (SDS)

### ED-1415 Allow Blank Anesthetic Type for Cancelled Day Surgery

For DAD Day Surgery cases when cancelled is entered as the intervention code the anesthetic type automatically defaults to 8. While WinRecs allowed the value to be changed it will not allow the visit to be saved with no value. The system will now allow a blank anesthetic type when intervention code = cancelled.

## System Maintenance - Look Up Profile

### ED-1409 V1.6 DAD Institutions and Types

The V1.6 DAD Institutions and Types table has been added to the Institution Look up table.

### ED-1443 Institution Type Change for Ontario Institution Number 59950

Institution Type 59950 has been changed from C to J. Clients can now use this value in the Amcare Institution To field in combination with visit disposition 16.

## Utilities - CIHI Submissions

### EN-1441 NACRS: Clinic Lite Submissions

To accommodate Clinic Lite Submissions a new Care Type has been added in the Submissions and Corrections Modules: B-C-Lite: Clinic Lite (CL, DI, OT).  
When this Care Type is used the submission level will default to 0.
