Release Notes for WinRecs Version 296.0.0

Release Date: March 14, 2019

The 2019 CIHI Fiscal edits are included in this fiscal release as well as Cancer Care Changes. The OMHRS DSM-5 ICD10 table is also included in this release.

Problem fixes and enhancements have been included as outlined in the Release Notes.

This release is cumulative only after the most recent WinRecs Update has been applied and therefore must be run on WinRecs installations that are on *version 295.0.0 or greater*.

Important: After all Fiscal Releases and Service updates have been applied coders should check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses.

Please note that WinRecs Version 296.0.0 contains a Fiscal Grouper Engine update. Clients with the CACS and CMG+/ CACS groupers please ensure all users are able to see the grouper information within the abstracting modules after applying this update. For clients with CACS and CMG+/CACS groupers you must batch group data prior to submitting Period 01 for 2019.

For additional information on this, or previous releases, contact MED2020 Customer Support at support@med2020.ca.

Table of Contents

Inpatient (DAD)

ED-1499   Project 740 - Date Fields

Mental Health (OHMRS)

ED-1517   IAR: 2019 Submission Changes

Rehabilitation (NRS)

ED-0299   RPG: Add LOS Field

System Maintenance - Look Up Profile

ED-1518   Create Special Project 315

ED-1519   Special Project 316

ED-1520   Create DAD Special Project 300 (BC)

ED-1522   Fiscal 2019 DAD Institutions and Types

System Maintenance - User Profile

PR-1491   User Profile: Skip Login Screen

Utilities - Batch Grouper

PR-1429   Ontario Clients: HIG Optimizer

PR-1483   Batch Grouper - Set Correction

Utilities - CIHI Submissions

ED-1469   Level 1 Warning to Include Opioid submissions

ED-1482   Alberta Health: MACAR Submission

ED-1508   Submission Provider Service Edits on Submission

PR-1088   EMT: Batch Verify

PR-1473   Opioid Submission Issue

Ticket Details

Abstracting ICD-10

PR-1539   Deleted Visits Display In Abstract Queue

Deleted visits were displaying the Abstract Queue. This has been corrected and deleted visits will no longer display in the Queue.

All Abstracting

ED-1447   Add New Mental Health Look Up Values

The Mental Health Look Up tables have been updated with the following descriptions:
Legal Status Upon Arrival to ED (DAD Group 15, Field 15 and NACRS data element 170)
• 20 — Involuntary psychiatric assessment
• 41 — Youth detoxification
• 42 — Youth detoxification and treatment

Legal Status at Admission (DAD Group 15, Field 16)
• 41 — Youth detoxification
• 42 — Youth detoxification and treatment

EN-1501   Expand size of Profile Abstract Screen

When selecting a profile abstract template to apply to a record, a screen pops up to display a list of available abstract profiles. This screen has now been expanded so that more can be displayed on screen at a time.

AmCare (NACRS)

PR-1489   CCI Applicable NACRS Attributes

A warning message has been added to the NACRS module, that states when a CCI code attribute is not applicable for NACRS and can only be used with the DAD module. An example of this is CCI code 1.UG.53.LA-PM with a status attribute of "R". For this example the status attribute of "R" can only be used for DAD records.

Cancer Care (CCM)

ED-1503   2019 Cancer Care Changes

The 2019 Cancer Care Changes are included in this update.

Chart Maintenance - CPI (Central Patient Index)

PR-1524   Chart Number Change

When doing a chart number merge and chart number alpha prefix was entered in lower case the value would also show as lower case in the visit.

The software has been modified and when any lower case alpha value is entered in Source Chart Number or Destination Chart Number it will default to upper case.

Inpatient (DAD)

ED-1499   Project 740 - Date Fields

Project 740 is being added to WinRecs for those sites who have not already manually added it.

Mental Health (OHMRS)

ED-1517   IAR: 2019 Submission Changes

Changes for 2019 IAR submissions have added to this release.

Rehabilitation (NRS)

ED-0299   RPG: Add LOS Field

The LOS has been added to RPG screen after Weight. The LOS has also been added to the view Rehab_RPG_VR

System Maintenance - Look Up Profile

ED-1518   Create Special Project 315

Special Project 315 for DAD and NACRS has been added to the Project table in Look Up Maintenance.

ED-1519   Special Project 316

Special Project 316 for DAD and NACRS has been added to the Project table in Look Up Maintenance.

ED-1520   Create DAD Special Project 300 (BC)

DAD Special Project 300 (BC Clients) has been added to the Projects table in Look Up Maintenance.

ED-1522   Fiscal 2019 DAD Institutions and Types

The latest version from CIHI for Fiscal 2019 DAD Institutions and Types has been added to the Institution (ICD10) table.

System Maintenance - User Profile

PR-1491   User Profile: Skip Login Screen

When Yes was entered in the Skip Login Screen field in the user profile the value would disappear upon reloading the profile although the function still worked. The value Y in Skip Login Screen field will now retain upon reloading the user profile.

Utilities - Batch Grouper

PR-1429   **Ontario Clients: HIG Optimizer**

When Batch Grouper is performed and the Store Optimize Data is Y, the HIG Code and HIG RIW will now be stored for the other diagnosis.

PR-1483   **Batch Grouper - Set Correction**

When Batch grouping and Flag records for correction = Y some sites reported all cases being flagged as corrections. This happened at sites that do not have the HIG or CACSON grouper. The HIG and CACSON values grouper values were being calculated even though the sites did not have these groupers.

This issue has been resolved.

Utilities - CIHI Submissions

ED-1469   **Level 1 Warning to Include Opioid submissions**

The following warning did not generate when Care Type B-E-O (ED Opioid Case) at a level 3 was run and there were still Level records that had not yet been submitted. The following warning will now also generate for Care type B-E-O:

"CIHI will not allow any Level 1 submission for any period after a Level 3 (ED) submission file has been sent. Some level 1 abstracts are not submitted in the selected period. Do you want to proceed with the Level 3 Submission File creation?"

ED-1482   **Alberta Health: MACAR Submission**

Fiscal 2019/20 Alberta Health (MACAR) submission changes have been included in this release.

ED-1508   **Submission Provider Service Edits on Submission**

When a record is opened there is an error checked to see if a service is valid and linked to the provider used. "Provider Service will be cleared because the code linked to it is invalid" and "intervention Provider Service will be cleared because the code linked to it is invalid". These errors that are checked when a record has loaded will now also be checked for during the submission process for DAD and NACRS.

PR-1088   **EMT: Batch Verify**

Clients with EMT can now run an EMT Batch Verify for submitted abstracts. In the CIHI Submission, 'Select Edit Library' C-Custom Edits only, 'Complete Re-verify' select S-Submitted.

PR-1473   **Opioid Submission Issue**

When a submission/correction is generated on Care Types B-E, B-C or B-D users can still access and code visits for the same period if the care type is different than the Care Type submission. However the system was generating the following warning when Care Type B-E-O (ED Opioid Case) was used in the submission process: The process cannot be processed because there are records from this period that are currently being accessed.

This issue has been resolved and Opioid submissions can run if different care type records are being accessed for the same period.
