

Release Notes for WinRecs Version 297.0.0

Release Date: March 12, 2020

2020 Fiscal edits are included in this fiscal release for DAD, NACRS, OMHRS and Cancer Care.

Note: OMHRS includes a new data element for 2020 Fiscal Year: (X141) Discharged With Support/Referral for Home Care Services.

Problem fixes and enhancements have been included as outlined in the Release Notes.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal **version 296.0.0 or greater.**

Important:

After all Fiscal Releases and Service updates have been applied coders should check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses.

Please note that WinRecs Version 297.0.0 contains a Fiscal Grouper Engine update. Clients with the CACS and CMG+ / CACS groupers please ensure all users are able to see the grouper information within the abstracting modules after applying this update. For clients with CACS and CMG+ / CACS groupers you must batch group data prior to submitting Period 01 for 2020.

For additional information on this, or previous releases, contact MED2020 Customer Support at support@med2020.ca.

ED-1773	Institutions Lookup Update Hospital Type

Ticket Details

All Abstracting

PR-1756 MB Health: Update Generic Facility To/From Combination

Generic Institution 69898 (Out of country – Emergency Department) will now allow the following numbers to be used in Manitoba facility to/from Fields: 9999 or 8002 (Roseau Area Hospital)

Cancer Care (CCM)

ED-1759 CCO 2020/21 Changes

Changes for 2020 Fiscal Year for the Cancer Care Module have been included in this release.

CodeFinder Integration

PR-1710 3M Bridge: Blank Occurrences Not Processing

When Intervention code was blank in WinRecs and Anaesthetic Technique had a value in the intervention multiform the 3M bridge populated the 3M intervention code with XX.

This will no longer happen and the bridge will now ignore blank intervention codes.

In addition Anesthetic Technique will not be overwritten when the returning packet is blank for that field

Continuing Care (CCRS)

ED-0805 RUG-III Plus (44 group) Methodology 2018-2019

The RUGS 44 Plus Grouper has been added to this update.

Crystal Views

ED-1740 Add New Data Element to OMHRS VR Crystal Views

The New Element X141 Discharged with Support/Referral for Home Care Services for 2020 OMHRS discharge assessments can be found under the following crystal views:
OMHRS_VR and OMHRS_ResDischarge_VR.

PR-1691 I10_Amcare_Projects_316_VR Issue

The I10_Amcare_Projects_316_VR was returning wrong values on reports and when used in combination with the I10Amcare_VR all data was removed from the report. The I10_Amcare_Projects_316_VR is now returning correct values and data is retained when this view is used with the I10Amcare_VR.

PR-1699 Rehab LOS Days Not Displaying Correctly In Crystal

When using Rehab Views the LOS days displaying on the report were incorrect and included service interruption days. This has been corrected and the LOS Days from main Rehab Views will now display the LOS days as follows:

(Element 21) Admission Date to (Element 30) Discharge Date, minus any Service Interruption LOS Days

Edits Management Tool (EMT)

PR-1768 Edits Management Tool: Regional Setting Display Date

If computer Region Settings Short Date format is set to dd-MMM-yy and in the Edits Management Tool the Valid To date is saved as 2099/03/31 it displays the year as 1999.

This has been resolved and the valid to date will now show as 2099 in EMT.

Inpatient (DAD)

ED-1757 MB Health: Updated ZCode and ALC Reason 46 Combination

MB Health 2020 Fiscal Change: When ALC Reason value of 46 is used it must be used in combination with ICD-10-CA diagnosis codes Z76.2 or Z76.3

ED-1774 MB Health: Institution/discharge Combination

Manitoba has made the following changes to the following Institution numbers and discharge disposition combination:

1) If Institution To = 65196 (MB Facility to = 0196) then
Discharge Disposition must = 30 .

2) Institution To or From = 66999, MB-MH facility must = 9999 or
9910 – BC PCH
9920 – AB PCH
9930 – SK PCH
9940 – ON PCH
9950 – QC PCH
9960 – NB PCH
9961 – NS PCH
9962 – PE PCH
9963 – NL PCH
9970 – YT PCH
9971 – NT PCH
9972 – NU PCH

The change now allows 9961 – NS PCH and
9972 – NU PCH

PR-1744 3M Coderfinder: Maternal Newborn Chart Number Removed

On initial save in an obstetrical chart where codes were chosen from 3M codefinder the maternal newborn chart number retained. If, however, the user has to make changes and went back into the 3m codefinder a second time upon exiting the maternal newborn chart number is removed from the abstract.

This issue has been fixed and the maternal newborn chart number will now retain.

PR-1778 Incorrect Hard Error: DAD CJRR Component

When intervention code 1.VA.53.LA-SL-N was coded and Status attribute = R and Component was left blank the following incorrect edit was generating:

If (Intervention Code is 1VA53^^, 1SQ53^^, 1VG53^^ or 1VP53^^) AND (Status Attribute is P or R) AND OOH Indicator is blank AND (Joint Identifier is coded and valid) AND (not 1VA53LLSL^ or not 1VA53LASL^) AND (not 1VG53LASL^) then at least one Component must be coded

This issue has been resolved to exclude mandatory component when intervention code coded at the 8th digit level has SL^ and status attribute is P or R and OOH is blank.

Mental Health (OHMRS)

PR-1716 OMHRS - Missing OMHRS Rule 20630

The following edit was not generating:

Rule 20630: IF Z1 Record Type = 5 and [X2 Submission Type = N or C] and [X90 Discharge Reason = 1] and [(X80 Discharge Date - CC1 Date Stay Began - X130 Total Days Away from Bed) > 6] THEN Q2a - DSM-5 code must not be blank.

The edit is now working correctly in version 297.

PR-1776 OMHRS: Hard Edit Should Be Warning

The following message was generating a hard edit and should have been a warning. The message will now generate as a warning only:

IF Z1 Record Type = any of (4, 5, 6) and Q1v = blank on Admission Assessment with the same AA4 Facility Number, X30 Chart Number and AA3 Case Record Number THEN Q1v DSM - Not Applicable should not = 1

System Maintenance - Look Up Profile

ED-1694 Update HCN Province CA Description

For HCN Province HCN Province Default Description CA has changed to the following:

CA: Canada (Penitentiary Inmates, Indian Affairs, Veteran Affairs)

NOTE: The Display Code was not updated to ensure site specific descriptions are not affected.

ED-1753 Fiscal 2020 DAD Institutions and Types V1.1 Jan 2020

Fiscal 2020 DAD Institutions and Types V1.1 has been included in this release.

ED-1773 Institutions Lookup Update Hospital Type

In lookup field maintenance, the hospital type field in the Institutions table has been updated from the 2020 Ontario Master Numbering.
