

# Release Notes for WinRecs Version 299.1

**Release Date: March 19, 2022**

The 299.1.0 Service Release includes problem fixes as well edit and table updates.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version **299.0.0** or greater.

After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to <ftp://ftp.med2020.ca/Winrecs2/Tools/> and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

For additional information on this, or previous releases, contact MED2020 Customer Support at <mailto:support@med2020.ca>.

## Table of Contents

### [WinRecs2\Abstracting](#)

#### [WinRecs2\Abtracting\CCM](#)

[PR\\_20754](#) Add 'Is Record Validated' and 'Is Record Complete' to all CCM views

## Ticket Details

#### [WinRecs2\Abtracting](#)

##### **PR\_20434 Warning Not Generating for E Combination Codes**

The Following Warning did not generate with E code combinations listed in the warning:  
If diagnosis code E109, E119, E139 or E149 at the 4 digit level is coded as diagnosis type M, 1, 2, 3, W, X or Y, there can be no other diagnosis code E10, E11, E13 or E14 at the 3 digit level coded as diagnosis type M, 1, 2, 3, W, X or Y

#### [WinRecs2\Administration](#)

##### **PR\_20524 Modify login exe to extend number of days to 365 from 60 for files deleted on launch**

Winrecs updates removed any files not accessed in 60 days. In order not to change any functionality to the current application the file accessibility for removal on launch of login exe has been increased to 365 days

#### [WinRecs2\Administration\Lookup Maintenance](#)

##### **PR\_20641 NACRS Clinic Lite Bundled Care -Project 960**

For NACRS Clinic Lite Bundled Care -Project 960 Question 10 has been enabled for

status.

**PR\_20646 Diagnosis Prefix N - Pressure Ulcer**

Diagnosis Prefix 'N' has been added to Diagnosis Prefix look up tables.

**PR\_20698 Fiscal 2022 DAD Institutions and Types V1.3**

Fiscal 2022 DAD Institutions and Types V1.3 has been added to the Institution (ICD 10) table.

**PR\_20755 Fiscal 2022 DAD Institutions and Types V1.4 May 2022**

Fiscal 2022 DAD Institutions and Types V1.4 May 2022 update is included in this release.

**WinRecs2\Abtracting\CCRS**

**PR\_20643 CCRS: Auto-populate 8 For Self Performance Fields**

When B1 comatose = Y then all Self Performance fields (G1aa to G2b ) will autopopulate with a value of 8 but will still allow the values to be changed if needed.

**WinRecs2\Abtracting\DAD**

**PR\_20649 Manitoba: Updated 2022 MB Inst From-To Disposition Grid**

Generic Institution To and From Numbers 69591 (law enforcement) and 69395 (virtual care) can now be used in combination with discharge disposition code 04 and MB Facility Number 9999.

**PR\_20694 DAD Clear Institution type Value On Save**

When HL7 sent an Institution To/From value with a disposition code that was not valid for Institution To/From, upon save the Institution value was removed but not the Institution Type. The Institution type will now clear for this scenario.

**PR\_20717 MB Health: Updated ALC Z Code and ALC Reason Codes Validation**

This release includes MB Health Updated ALC Z Code and ALC Reason Codes Validation. There was also an issue when ALC Reason code 49 was used with any of ALC Z\*\* Diagnosis codes the following incorrect hard edit generated:  
Invalid ALC Reason Code for the Diagnosis code.

This issue has been resolved and ALC Reason Code 49 can now be used with any ALC Z\*\* Diagnosis Code.

**WinRecs2\Abtracting\NRS**

**PR\_20655 NRS: Update RPG/RPW Table to 2022 Values**

The RPG/RPW table has been updated to report the 2022 values in report writing.

**PR\_20681 NRS ICD 10 Picklists and Validation Tables**

The 2022 NRS ICD 10 Picklists and Validation Tables are included in this release.

**WinRecs2\Abtracting\OMHRS**

---

**PR\_20657 OMHRS: Revised Edit for Element X160 Schizophrenia**

Collection rules for X160 Schizophrenia have changed as follows:  
Short Stay Assessment Type 7 – X160 is always mandatory

Discharge assessment Type 5 - X160 always Mandatory if LOS is <= 6 (Short Discharge not Short Stay Assessment ) days then Reason for Discharge does not matter and X160 should not be blank and

if LOS >6 and X90 Reason for Discharge not =1 then X160 should not be blank.

For the cases where Reason for Discharge = 1 and LOS > 6 if Q2a is has one of the F25\* or F209 schizophrenia codes then that replaces having to code X160 = 1 and if no Q2a code of F25\* or F209 was entered then that implies no for schizophrenia. So for all cases where LOS > 6 days and Reason for discharge = 1 element X160 is not mandatory.

For Sites requiring further clarification on these rules please contact your CIHI Rep for data collection guidelines.

**PR\_20710 OMHRS: DSM-5\_TR Codes**

DSM-5-TR codes have been added to this release.

<b><u>WinRecs2\Abstracting\NACRS</u></b>
--

**PR\_20706 NACRS Reproductive Fields**

NACRS Elements 69 to 74 are now enabled and optional for Levels 1, 2, 3 DS, CL and CL Lite with the exception when MainProblem O04^ and intervention code of 5CA88^^ or 5CA89^^ are used then Elements 69 to 74 are mandatory.

<b><u>WinRecs2\Abstracting\CCM</u></b>
