

Release Notes for WinRecs Version 299.2.0

Release Date: September 22, 2022

The 299.2.0 Service Release includes problem fixes as well edit and table updates.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version **299.0.0** or greater.

Important: This release contains an update to the SCIPP Grouper. All sites with SCIPP grouper should regroup Mental Health Assessments.

After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to <ftp://ftp.med2020.ca/Winrecs2/Tools/> and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

For additional information on this, or previous releases, contact MED2020 Customer Support at <mailto:support@med2020.ca>.

Ticket Details

[WinRecs2\Abstracting\DAD\MB](#)

[PR_20777](#) **Obstetric Calculation not Calculating Properly**

Issue fixed where “Total Duration of Labour” field and “Total Duration of Labour in Hours” field were not calculating properly. These two fields will now calculate properly when data is input or edited in “Start of First Stage Date” field, “Start of First Stage Time” field, “Start of Second Stage Date” field and “Start of Second Stage Time” field.

[WinRecs2\Abstracting\NRS](#)

[PR_20821](#) **NRS Discharge Assessment: Missing Edit for Element 28B-Provider Type Identification Number**

When an alphanumeric value was entered for Provider Type Identification number the following hard edit did not generate:

Provider Number cannot be alphanumeric - must be numeric values only.

WinRecs2\Abstracting\NACRS

PR_20832 Reproductive Fields Enabled When Recorded Sex or Gender = M

Reproductive Fields will now disable when Recorded Sex or Gender = M

WinRecs2\Abstracting\CCM

PR_20856 AJCC Staging 9

AJCC Staging 9 update has been included in this release.

WinRecs2\Reporting

PR_20864 Intervention Replicate Views - Copy Intervention Code and Associated Attributes

When using the Intervention Replicate View the intervention code and associated attribute/s did not copy over to the occurrences with only provider Service/Specialty values entered. The previous intervention code and attribute will now display on the report in the next occurrence with only Provider Service/Specialty values.

WinRecs2\Administration\Lookup Maintenance

PR_20904 Fiscal 2022 DAD Institutions and Types V1.5

Fiscal 2022 DAD Institutions and Types V1.5 update is included in this release.

WinRecs2\Abstracting\OMHRS

PR_20966 DSM-5-TR Updates

DSM-5-TR table has been updated.

WinRecs2\Abstracting\DAD

PR_21021 Manitoba: Updated ALC Reason and Z Code Combinations

ALC Reason Code and Z Code combinations have been updated - please see updates provided by MB Health.
Important: These changes are effective as of 20220401 and invalid combinations on previously coded visits will trigger an error for combinations that are now invalid.

WinRecs2\Utilities\Batch Grouper

PR_21039 SCIPP Grouper Issue

An issue has been found where element DD2 Number of Psych Admits (lifetime) for some of the SCIPP grouper calculations. The grouper will now allow for this methodology.
All sites with SCIPP grouper should regroup Mental Health assessments.
