Release Notes for WinRecs Version 299.3.0

Release Date: December 1, 2022

The 299.3.0 Service Release includes problem fixes and table updates.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version 299.0.0 or greater.

After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to ftp://ftp.med2020.ca/Winrecs2/Tools/ and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

For additional information on this, or previous releases, contact MED2020 Customer Support at mailto:support@med2020.ca.
