Release Notes for WinRecs Version 300.1.0

Release Date: May 23, 2023

The 300.1.0 Fiscal Release includes Problem fixes and Table updates.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version 300.0.0 or greater.

After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to ftp://ftp.med2020.ca/Winrecs2/Tools/ and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

For additional information on this, or previous releases, contact MED2020 Customer Support at mailto:support@med2020.ca.

Table of Contents

Ticket Details

WinRecs2\Reporting\Views

PR_21383 **Missing Abstract and Batch fields to the I10_views**

The I10_Abstracting and I10_AbstractingGeneral_VR has been updated to include: AbstractNumber, Batch Number, BatchPeriod, BatchPeriodDesc, BatchPeriod_BC, Batch Year fields.

WinRecs2\Abstracting\CCM

PR_21433 **Cancer Care - Add New Codes to AJCC Staging Version 9**

Staging Version 09 has been updated to allow codes for Appendix, Anus and CNS - these new codes are effective as of January 1, 2023.

WinRecs2\Abstracting\OMHRS

PR_21446 **OMHRS - Field K5 - Acute Control Medications - Field Length**

The OMHRS field - K5 - Acute Control Medications had a field length of 3, but submission field length is 1. This field length has been adjusted to only accept 1 character.

WinRecs2\Administration\Lookup Maintenance

PR_21448 **Fiscal 2023 DAD Institutions and Types V1.3 Apr 2023 and Fiscal 2022 DAD Institutions and Types V1.11 Apr 2023**

Fiscal 2023 DAD Institutions and Types V1.3 Apr 2023 and Fiscal 2022 DAD Institutions and Types V1.11 Apr 2023 have been included in this release.

PR_21558 **Fiscal 2022 DAD Institutions and Types V1.12 May 2023 and Fiscal 2023 DAD Institutions and Types V1.4 May 2023**

WinRecs2\Abstracting\NRS

PR_21453 **NRS Diagnosis Code - G61.0 - Guillain-Barre Syndrome**

The diagnosis code Guillian-Barre Syndrome had a spelling error and this has been fixed.

PR_21460 **NRS - Update RPG/RPW Table to 2023 Values**

The RPG/RPW table has been updated in Crystal to include 2023.

WinRecs2\Abstracting

PR_21519 **3M Bridge Add Sys Tag**

A new field has been requested to be added to the 3M bridge called SYS. It will be important to check with 3M that your system is compatible to receive this tag before running the update. The filed is controlled in hospital profile with a setting called "3M Codefinder and Calculate".
If the value is Y, Winrecs 3M bridge will add tag 'SYS:1'. Otherwise Winrecs 3M bridge will add tag 'SYS:0'.
The default value is Y. When 'Y' is selected both 3M codefinder and CAC will be launched. When value is set to 'N', only codefinder will launch.

WinRecs2\Abstracting\CCRS

PR_21531 **Add CCRS Field 'Other System MRN' for Conversion**

A field named 'CCRS other system MRN' has been added to the CPI field list and is hidden by default. The purpose of this field is for CCRS submissions to allow an alternative chart number value to be sent to CIHI instead of the WinRecs chart number. This field will only need to be used when the WinRecs format of a CCRS chart number does not match what CIHI has.
