

Release Notes for WinRecs Version 301.0.0

Release Date: March 7, 2024

The 301.0.0 Fiscal Release includes 2024 CIHI edit and Table updates.

This release is cumulative only after the most recent WinRecs Update has been applied however the update must be applied on minimal version **300.0.0 or greater.**

Important:

CIHI has provided SNOMED CT Mapping to ICD10CA Diagnosis codes as well as for the ED Discharge Diagnosis (CED-DX) codes. The SNOMED CT Mapping has been added as WinRecs Look up Table - please note some SNOMED CT codes do not have mapping to DX codes and some can be assigned to more than one diagnosis code.

SNOMEDCT ID field/descriptions have been added to the DAD and NACRS Diagnosis multiform as well as the ED Discharge Diagnosis multiform - please reference tickets concerning this field.

Sites can no longer create new Institution Profiles - see ticket 21983.

For those sites with CMG and CACS Groupers, the 301.0.0 Release contains a Grouper Engine update. Fiscal 2024 DAD and NACRS Level 2/3 abstracts must be batch grouped prior to submitting 2024 Period 01 files to CIHI. A warning message indicating "No Grouper value..." will display should the record not be grouped with the current grouper year.

After all releases have been applied sites with CACS and/or CMG groupers should have all coders check to ensure they can see grouper values in the visits. For Citrix clients this should be confirmed on all Citrix IP addresses. If grouper values are not displaying on a workstation/s please go to <ftp://ftp.med2020.ca/Winrecs2/Tools/> and download the file called regasm.zip. Extract the file to the desktop/s of the affected computer/s. Double click the file; a black window will flash, and the process is complete. This will register the grouper dll.

For additional information on this, or previous releases, contact MED2020 Customer Support at <mailto:support@med2020.ca>.

I10_AbstractingGeneral_VR: New Fields

Ticket Details

WinRecs2\Administration\Lookup Maintenance

PR_21878 Fiscal 2023 DAD Institutions and Types V1.7 Oct 2023

Fiscal 2023 DAD Institutions and Types V1.7 Oct 2023 is included in this release.

PR_22010 Fiscal 2023 DAD Institutions and Types V1.8 Dec 2023

Fiscal 2023 DAD Institutions and Types V1.8 Dec 2023 has been included in this release.

PR_22074 Adding Residence Code CIHI Value

When adding a new Residence Code in the Residence Code LU table the CIHI code value was disabled - this will field is now be enabled on initial new entry and will disable upon save.

PR_22135 Fiscal 2023 DAD Institutions and Types V1.9 Jan 2024 Update

Fiscal 2023 DAD Institutions and Types V1.9 Jan 2024 is included in this release.

WinRecs2\Abstracting\NACRS

PR_21880 Batch interface diagnosis code not populating diagnosis type M for NACRS

A non-mandatory CIHI warning "The first occurrence must be M and no other occurrence can be M" was generating for the first occurrence diagnosis type in NACRS. This edit has been removed, and the warning will no longer populate.

PR_21989 PanCanadianHealthConcernValueSet

For 2024 CIHI has released PanCanadian Health Concern Value Set which maps SNOMEDCT codes to the AmCare CED-DX Codes (ICD10). In the ED Discharge Diagnosis multiform a new field SNOMED CT ID has been added (**NOTE: Field must be enabled in the control file**)

When the user enters the SNOMEDCT code it will auto-populate the ICD10 CED-DX code.

PR_22062 NACRS Clinic Lite Bundled Care Data Requirements 2024-2025

NACRS Clinic Lite Bundled Care Data changes for 2024 Fiscal Year have included - please reference CIHI documentation for changes to Clinic Lite Bundle Care Requirements.

WinRecs2\Abstracting\SDS

PR_21883 Incorrect Hard Edit Provider Service DAD Day Surgery

DAD Day Surgery: When a Provider Service of 01006 as M was entered the following Hard Edit is Generating:

If Provider Service is 01000 - 20000 excluding 01001, 01002, 01003, 11004, 02001, 01013, 01014 and 11003 provider type must be 7 or 8.

For Day Surgery this edit takes precedence thus cancelling out the above edit and will no longer generate:

If provider type is M and the institution type is day surgery(A), the provider service must be 00001 - 30000.

WinRecs2\Reporting\Views

PR_21888 Add Triage Date/Time to Physician Initial Assessment Date/Time difference

A new calculated field called Triage/Physician Initial Assessment has been created. This field will calculate the difference from Triage Date/Time to Physician Initial Assessment Date/Time in minutes.

PR_21900 WR2_View to list deleted records in Purge

A view called Sec_Deleted_Information_VR has been created. This will list visits that have been deleted and are in the Purge module waiting to be purged or recovered.

PR_21993 Add SNOMED CT Code/Descriptions to ED Discharge Diagnosis Views and New LU View

SNOMED CT Code/Descriptions have been added to the following views:

I10_Amcare_And_DischargeDiagnosis
I10_Amcare_DischargeDiagnosis

As well a new View called LU_ED_Discharge_SNOMED_CT_ID_VR has been added. This view includes the SNOMED CT ID/Descriptions as well as Map Target/MapTargetDescriptions which is the ED Discharge Diagnosis/Descriptions that the SNOMED codes are mapped to.

PR_21995 Diagnosis Code Views: Add SNOMED CT Code/Descriptions and New LU View

The SNOMED CT Code/Descriptions have been added to the following views:

I10_Amcare_Diagnosis_VR
I10_Amcare_And_Diagnosis_VR
I10_Diagnosis_VR
I10_Abstract_And_Diagnosis_VR

As well a new View called LU_SNOMED_CT_ID_VR has been added. This view includes the SNOMED CT ID/Descriptions as well as Map Target/MapTargetDescriptions which is the Diagnosis Code/Descriptions that the SNOMED codes are mapped to.

WinRecs2\Abstracting\CCRS

PR_21926 Incorrect Warning Message Populating for CCRS L-0A Assessments

A CIHI warning message "Resident from the same facility (AA6) with the same health record number (A6a) should have consistent sex (AA2) and birth date (AA3a)" was incorrectly populating for CCRS L-0A assessments. Warning has been fixed by replacing the health card number, with health record number as per the warning rule.

WinRecs2\Abstracting\OMHRS

PR_21929 2024 DSM-5-TR Update

2024 DSM-5-TR Updates are included in this release.

WinRecs2\Abstracting\NRS

PR_21976 CCM - AJCC v9 Staging Error - Cervix Uteri

The value 'T1b3' in the Clinical Stage - T Category field has been added.

WinRecs2\Administration\Institution Profile

PR_21983 Disable New Button For Institution Profile

The "New Button" in Institution Profile has been disabled. Sites must now contact MED2020 Support to create a new Institution Profile.

WinRecs2\Abstracting

PR_21991 CIHI SNOMEDCT_ICD10CA Mapping

For 2024 CIHI has released mapping for SNOMEDCT Codes to ICD10CA codes. For DAD and NACRS Diagnosis multiform a new field called SNOMED CT ID has been added
(NOTE: Field must be enabled in the control file)

When the user enters the SNOMEDCT code it will auto-populate the ICD10CA diagnosis code.

WinRecs2\CPI

PR_22035 CPI Duplicate Warning Populating With Different Hospital Links

A duplicate warning was populating in CPI for the same patient that had different hospital links. This has been changed to include hospital link as a duplicate checking function if hospital link is not blank.

WinRecs2\Abstracting\CCM

PR_22129 2024 Cancer Care Changes

2024 Cancer Care Changes have been included in this update.

WinRecs2\Reporting

PR_22158 I10_AbstractingGeneral_VR: New Fields

In the view I10_AbstractingGeneral_VR the following new fields have been added

- Institution From
- Institution From Desc
- Institution From Type

- Institution To
- Institution To Desc
- Institution To Type
