Ticket Details

[WinRecs3\Tools\File Management\NACRS](#)

[PR_27424](#) **Separate Clinic Lite submissions Hip and Knee Bundled Care vs Community Stroke Rehabilitation**

Users can now create separate Clinic Lite submission files for Hip and Knee Bundled Care vs Community Stroke Rehabilitation.

The MIS code must be assigned either HIP and Knee Bundled Care or Community Stroke Rehab in the Submit Clinic Lite field in the MIS Code Look Up table.

In Submissions under Care Type for CL Lite the following two options are now available:

H-K - Hip and Knee Bundled Care

S=R - Community Stroke Rehab

[WinRecs3\Modules\Clinical\\[IRRS\] Integrated interRAI Reporting System](#)

[PR_27612](#) **IRRS Date Stay Began Update Sync**

A change has been made to update the Date Stay Began as well as all of the other Patient & Encounter Record fields in linked assessments, when the value is changed in the parent admission assessment. These are now marked with a yellow square for Patient and blue square for Encounter.

When the assessment loads, it will pull the values from the parent to sync Patient Fields and the parent encounter to sync encounter fields. If the patient/encounter field is enabled in the child assessment type (e.g. Responsible for Payment fields). Then it will NOT over right the value, if it's disabled, it will over right the value no matter what.

In addition, saving the child records, will sync the Patient/Encounter fields that are enabled, e.g. Change the Responsible for Payment fields and save a Routine Assessment, the First Assessment will now be updated to have the same field values.

PR_27745 IRRS Failed Submit List View not showing failed submissions

The IRRS Failed Submit List and IRRS Approve Submit ListViews will now show submissions by all users and not just the user logged in.

PR_27781 IRRS: Icon to indicate field used to calculate RUGS

Three colored icons have been added to the 2nd box in the Main Grid for IRRS Assessments:

Green - Will be for all the fields used in the RUG calculation

Yellow - Will be for all the fields used in the Patient Record

Blue - Will be for all the fields used in the Encounter Record

PR_27792 IRRS Rejection: Date Stay Began after Last Day of Stay

The following error messages for IRRS have been added into WinRecs:

Date Stay Began is after Last Day of Stay

ReturnDate is after Last Day of Stay.

Program Start Date is after Program End Date.

Program End Date is after Last Day of Stay.

PR_27797 IRRS RUG-III-plus Adjustments

Infection Control was not producing SE1 and SE2 RUG-III-plus categories - this has been corrected.

PR_27798 IRRS Submission Screen Filter on Previous Fails

When both View Failed and View Successful boxes were checked in the IRRS Submission History Viewer past fails that had been accepted were showing as Fail under Status. The past fails that have been accepted will no longer display as Fail.

PR_27803 IRRS Health identification number (A5a) = 2 if the person is not a resident of Canada

An update has been made to properly submit the appropriate values if iA6d (Province or Territory Issuing Healthcare Identification Number) = 1, then Health identification number (A5a) = 2 if the person is not a resident of Canada OR if the person is a resident of Canada and health services are paid for by the federal government.

WinRecs3\Tools\Purge

PR_27664 Purge Module Remove Hospital Selection for Single Site

For databases with only one hospital, when launching the purge module, the user will no longer be prompted to select a hospital.

WinRecs3

PR_27676 IRRS: Assessment Reference Date and Next Assessment Date

New IRRS abstract being added in to the IRRS module will not default the Assessment Reference Date to 90 days if the Institution Profile setting is 0 days. Not setting this default or leaving it blank will also treat this like a zero.

If there is a default date in the Institution Profile setting then the system will input this data in to the IRRS abstract.

PR_27764 IRRS Discharge R3 Default

When R2 is coded as 12 or 16 Home Care Services Scheduled at Discharge (R3) will default to 0 (NO).

WinRecs3\Reporting\Views

PR_27734 Create IRRS_ErrorsWarnings_VR to link to the IRRS views

A new view is now available called IRRS_ErrorsWarnings_VR.

PR_27775 Create Views for Projects 968-974

The following views have been added:

I10_Amcare_Projects_968_VR
I10_Amcare_Projects_969_VR
I10_Amcare_Projects_970_VR
I10_Amcare_Projects_971_VR
I10_Amcare_Projects_972_VR
I10_Amcare_Projects_973_VR
I10_Amcare_Projects_974_VR

PR_27816 OMHRS_VR - HCN version

HCN version was added to the following two views:

OMHRS_VR
OMHRSbyElementID_VR

PR_27836 OMHRS_VR DischargeSupportHomeCare_X141

An issue has been corrected in the OMHRS view where X141 Discharged With Home Care Support was previously not returning data.

WinRecs3\Maintenance\Lookup Code Maintenance

PR_27737 ICD10CA_CCI_MachineConsumableCanadianCodingStandards_Beta_EN.xlsx - Copy

PR_27815 Fiscal 2026 DAD Institutions and Types V1.6 June 2026

Fiscal 2026 DAD Institutions and Types V1.6 June 2026 update is included in this release.

WinRecs3\Tools\Batch Grouper

PR_27793 Batch Grouper IRRS

Batch Grouper for IRRS was only returning CCRS Institution Numbers in the Institution Drop down list. The dropdown list will now include IRRS Institution numbers.
