Ticket Details

WinRecs3\Modules\Abtracting\[DAD] AbsCare Inpatient	
PR_27376 BC Entry Code E does not default Project 101 and with Arrival Date and Time in ED	When "ER Date Arrival Date" and "ER Time Arrival Time" are enabled and visible in control file. If "Entry Code" = E, "ER Date Arrival Date" has validate date and "ER Time Arrival Time" has valid time, Winrecs will add project 101 or modify existing project 101 with new "ER Date Arrival Date" and "ER Time Arrival Time".
PR_27789 DAD Lock Down Date Selection	The lock down date settings will only be checked in DAD when the Discharge Date has a value. Previously when the Discharge Date was blank, the Admit Date was used.
WinRecs3\Modules\Abtracting\[NACRS] Level 3 AmCare Ambulatory	
PR_27554 NACRS duplicate Records Check	The list of fields has been expanded to identify a record as being unique. If any of these fields is different, WinRecs will allow the record to be saved. Regional Link

Hospital Link
Chart Number
Reporting Facility
Registration Date
Registration Time
Ambulatory Registration Number
Ambulatory Registration Sequence
Abstract Identification Number

PR_27851 **NACRS Default NPJA Service**

Now when entering a non-physician provider number, the corresponding provider service will be defaulted based on the provider maintenance configuration.

WinRecs3\Tools\Purge

PR_27664 **Purge Module Remove Hospital Selection for Single Site**

For databases with only one hospital, when launching the purge module, the user will no longer be prompted to select a hospital.

WinRecs3\Modules\Abstracting\[NACRS] Level 1 AmCare Ambulatory

PR_27788 **NACRS Submission Level Code**

An adjustment has been made to ensure that the field 'Submission Level Code' will always be assigned a value when a submission file is created across all levels.

WinRecs3\Maintenance\Lookup Code Maintenance

PR_27820 **PanCanadianHealthConcernValueSet_June2026**

PanCanadianHealthConcernValueSet_June2026 update included in this release.

PR_27822 **CIHI SNOMEDCT_CA_to_ICD10CA Map_June2026**

PanCanadianHealthConcernValueSet_June2026 update included in this release.

WinRecs3\Modules\Abstracting\[NACRS] Level 0 (Clinic Lite) AmCare Ambulatory

PR_27835 **NACRS Lite Submission Level Code**

After running a NACRS Lite submission, the submission level code 0 did not populate in the abstract. The value will now populate.

WinRecs3\Modules\Clinical\[MHRS] Mental Health Registry System

PR_27845 **OMHRS: Edit Verification Should Not look at Admission Date**

An issue was reported where Admission Date = March 2026 and Assessment Reference Date (A1) = April 2026 however the submission process did not trigger errors the assessment was missing new 2026 mandatory fields. A change has been made to OMHRS to use only A1 to check the fiscal year.

PR_27852 OMHRS: New fields are not flagging as mandatory for Old Assessments opened in current fiscal year

When opening old Fiscal admission and Short Stay Assessments and saying Yes to: **"Would you like to load with the current fiscal year edits"**, the new 2026 fields **BB8a to BB8l** and **BB7a to BB7f** were not flagging as mandatory. This issue has been corrected.

WinRecs3\Reporting\Views

PR_27849 Adjusting ModuleName Field in VisitHistory_VR

The VisitHistory_VR has been Modified as follows:
ModuleName to show descriptions like "Mental Health - Discharge".
Add new field ModuleType to show MHRS.

WinRecs3\Reporting

PR_27853 IRRS View Records with Referring Provider Duplicated

An issue has been fixed in the IRRS views that was resulting in duplicates being returned when a record had a referring provider value.

WinRecs3\Modules\Clinical\[IRRS] Integrated interRAI Reporting System

PR_27857 IRRS RUGS SE2 Calculation

When iN2d (Iv medication) = 2 or 3 and iN2m (palliative) = 2 or 3 and ADL = or > 7 RUG-III plus was assigning the incorrect RUG Group instead of SE2 which was the correct value. SE2 was only assigned when Infection control was also assigned. SE2 will now be assigned when iN2d (Iv medication) = 2 or 3 and iN2m (palliative) = 2 or 3 and ADL = or > 7 and will not depend on infection control for this scenario.

PR_27863 IRRS - RUG Categories BA1 & BB1

RUG Groups of BA1 & BB1 were blank. The grouper has been adjusted to assign RUG BA1 and BB1.

WinRecs3\Modules\Abstracting

PR_27860 Delete Occurrence Confirmation Selection

When deleting a multiform occurrence, the **"Are you sure you want to delete this occurrence?"** prompt will make Yes the default option.
