Ticket Details

WinRecs3\Administration\Lookup Maintenance

PR_22663   **Allow User to Set Customized Default Sort for Lookup Values**

Users can now control the sort options for each field's look up results grid. Each look up field will still default to what it was doing before, but if you change the column or the sort order (ascending/descending) it will remember which options you selected and next time you search in that look up field, it will load the same way. It is Module, Field, and User specific.

PR_23913   **Fiscal 2024 DAD Institutions and Types V1.6 July 2024**

Fiscal 2024 DAD Institutions and Types V1.6 July 2024 is included in this release.

PR_24201   **CIHI SNOMEDCT_ICD10CA Map_Jul 2024**

CIHI SNOMEDCT_ICD10CA Map_Jul 2024 update is included in this release.

PR_24204   **panCanadianHealthConcernValueSet_July 2024**

panCanadianHealthConcernValueSet_July 2024 update is included in this release (ED Discharge Diagnosis Multiform SNOMEDCT code mapping to ED discharge DX).

WinRecs3\Modules\Abstracting\[SDS] AbsCare Day Surgery

PR_24601   **MB: Incorrect Hard Error Generating for Postpartum Patient Service 59**

An incorrect error message was populating for abstracts with Patient Service 59 (postpartum) in the SDS module, requiring Gestational Age to be filled out. This is not a requirement for postpartum and the error will no longer generate

WinRecs3\Modules\Clinical\[MHRS] Mental Health Registry System

PR_22659   **Remove X8 in Field Status for Date Admitted to Mental Health Bed field**

Incorrect CIHI Element ID X8 for field 'Date Admitted to Mental Health Bed'. This field is not submitted to CIHI. The CIHI Element ID X8 has been removed for this field from the Field Status Bar.

WinRecs3\Modules\Clinical

PR_23835   **Sort Order of Visit History: CCRS, NRS and OMHRS**

A new feature has been added to the Visit History window to sort the patient visits chronologically based on visit date even when the visit time is blank.

WinRecs3\Reporting\Views

PR_24439   **DAD Project 316 View Field Length**

For the DAD Project 316 views, the field length has been fixed to correctly show all digits of the polyp size.

WinRecs3\Utilities\CIHI Submission

PR_23901   **SDS FIF File Settings Don't Retain on Save Button**

The FIF file settings for SDS will now retain when the save button is clicked. Previously they were only saving correctly when a file was created.

PR_24199   **Manitoba: MBHA Zero Separation File Not Created**

Zero separation files were not being created successfully for sites that had no submissions for a specified period. This issue has been corrected and the zero-separation file will now be created successfully.

PR_24108   **Submission Records Saved are Locked**

A change has been made to prevent records from becoming locked when they are saved in the submission module. A locked record is a record being accessed that prevents a submission file from being created.

PR_24571   **NACRS Level 1 File Creation Changes "Is Complete" field in view to N**

If ER Level 3 visit is completed by user and it does not contain messages and the 'Is Complete'= Y, when an ER Level 1 submission is run it will change 'Is Complete; from Y to N.

WinRecs3\Tools\[EMT] Edits Management Tool

PR_23593   **EMT Select Edit Library Field Disabled If No Access to EMT**

In User Profile, if user does not have access to Edits Management Tool but has access to File Management, the 'Select Edit Library' field will now be enabled so they can run a Batch Verify for System Edits and/or Custom Edits.
